

# Labware

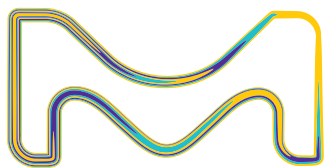

We provide a complete range of high-quality products from small instruments to consumables needed in routine laboratory work. “Labware” includes pipettes, syringes, dispensers, cultureware, filters, membranes and more from one single source: Merck.

Laboratory equipment, glassware, and plasticware are essential for the success of any laboratory. Combining our Millipore® and Premier Partners catalogues, we’ve put together every lab’s essential products to thrive and succeed.

- **Millipore®** provides a wide range of syringe filters, membranes, glassware and associated hardware for your filtration needs.
- **Brand®** GmbH specializes in providing labs convenient, reliable bottle-top dispensers, pipettes and other tools to help researchers get their work done efficiently.
- **Eppendorf®** manufactures instruments and consumables for liquid, sample, and cell handling in laboratories. Its product ranges include pipettes, dispensers, centrifuges and mixers.
- **DURAN®, WHEATON® and KIMBLE®** are leading manufacturers of precision glassware, laboratory consumables and specialty products for life sciences.
- **Whatman®** provides a wide range of filters, paper filters, membranes and syringes for specialized applications.

In addition to these Partner brands, we offer many additional options for laboratory equipment, storage and accessories.

The life science business of Merck operates as MilliporeSigma in the U.S. and Canada.
